

TEJAS SHARAD KUTE

Artificial Intelligence & Machine Learning Specialist | Full-Stack Software Developer

+91 8976550171 | tejas-kute284@gmail.com | github.com/tejas-kute284-dotcom | linkedin.com/in/tejas-kute-512aa2363 | Mumbai, India

PROFESSIONAL SUMMARY

Motivated B.Tech Artificial Intelligence & Machine Learning student and Full-Stack Developer with hands-on experience architecting high-performance web applications, real-time backend systems, and responsive user interfaces. Proven track record in national hackathons and industry internship, specializing in React, Node.js, FastAPI, Python, and scalable database architectures.

TECHNICAL SKILLS

Programming Languages:	Python, C, C++, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
Frameworks & Web:	React 18, FastAPI, Node.js, Express.js, Tailwind CSS, Framer Motion, WebSockets, REST APIs
AI / ML & Analytics:	TensorFlow, PyTorch, Scikit-Learn, Pandas, NumPy, Data Structures & Algorithms
Databases & DevOps:	MongoDB, MySQL, Git, GitHub, Vite, VS Code, Postman, Linux
Security & Concepts:	JWT Authentication, Bcrypt Hashing, CSP Security Headers, Input Validation, Rate Limiting

PROFESSIONAL EXPERIENCE

Web Development Intern — Aerus Infotech Solutions Pvt. Ltd.	Navi Mumbai, India Nov 2025 – Present
- Architected a Housing Society Maintenance Management System (HSMMS) covering 8 core modules — resident records, billing, complaint tracking, and security gate management. - Built fine-grained Role-Based Access Control (RBAC) across 4 user personas (Admin, Resident, Staff, Security Guard) utilizing Node.js/Express and React. - Designed RESTful APIs connecting MySQL database with front-end interfaces, ensuring sub-100ms response times and data consistency. - Authored comprehensive technical documentation (PRD, TRD, API guidelines) compiled into a developer guide to streamline team onboarding.	

FEATURED PROJECTS

FlowState — Focus OS NMIMS National Hackathon 2025	React 18, TypeScript, Tailwind CSS, Framer Motion
- Designed and shipped a premium productivity OS concept in under 18 hours at Cyber Cypher (NMIMS National Hackathon 2025), qualifying Round 1. - Engineered modular React 18 + TypeScript architecture with a custom design system, glassmorphism UI, Framer Motion animations, and an Omni-Search (Cmd+K) command palette.	
NexusChat — Real-Time Chat Platform	FastAPI, React, WebSockets, MongoDB, JWT, Bcrypt
- Developed a full-stack real-time messaging application using asynchronous FastAPI backend and React (Vite) frontend with WebSockets. - Secured backend with JWT authentication, Bcrypt password hashing, rate limiting, and input validation against brute-force attacks.	
CryoNex — Cold-Chain Logistics Platform	JavaScript (ES6), Leaflet.js, Chart.js, Anime.js, Tailwind CSS
- Built a pharmaceutical cold-chain logistics platform monitoring real-time telemetry across 6 global hubs (SIN, FRA, LHR, GVA, HND, BOM) via Leaflet.js. - Developed a multi-step Procurement Wizard with dynamic route calculations, automated excursion risk alerts, and browser state persistence.	

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning Atharva College of Engineering (Atharva University)	Mumbai, India Expected 2029
Relevant Coursework: Machine Learning, Deep Learning, Data Structures & Algorithms, Python Programming, Cybersecurity	
Higher Secondary Certificate (12th Grade - Science) Swarajya Senior Secondary School (NWAC)	Year: 2025 81%
Secondary School Certificate (10th Grade) St. Arnold High School	June 2023 86%

CERTIFICATIONS

University of Michigan (Coursera): Programming for Everybody (Python), Python Data Structures | **University of Pennsylvania (Coursera):** Intro to Java & OOP, Computational Thinking for Problem Solving | **Leadership & Management:** Management Skills for New Managers, Teamwork Skills, Grow as a Manager (ULSA & UC Boulder)
