

TEJAS SHARAD KUTE

B.Tech 2nd Year Student | AI & Machine Learning | Full-Stack Developer

+91 8976551711 | tejaskute284@gmail.com | linkedin.com/in/tejas-kute-512aa2363 | github.com/tejaskute284 | Mumbai, India

OBJECTIVE

Motivated 2nd Year B.Tech student specializing in Artificial Intelligence & Machine Learning, seeking an internship where I can apply and grow my analytical, problem-solving, and development skills on real-world challenges, while expanding expertise in AI, full-stack development, and cybersecurity domains.

EDUCATION

B.Tech - Artificial Intelligence & Machine Learning

Mumbai, India

Atharva College of Engineering, Atharva University Mumbai | Currently in 2nd Year

Expected: 2028

- **Relevant Coursework:** Machine Learning, Deep Learning, Data Structures, Python Programming, Cybersecurity Fundamentals

Higher Secondary Certificate (12th) - Science

Mumbai, India

Saraswiya Senior Secondary School | NWAC Board

2025

- **Percentage:** 81%

Secondary School Certificate (10th)

Mumbai, India

St. Arnold High School

June 2023

- **Percentage:** 86%

EXPERIENCE

Web Development Intern

Navi Mumbai, India

Aerus Infotech Solutions Pvt. Ltd.

Internship Period

- Contributed to the development of a Housing Society Maintenance Management System (HSMMS) covering 8 functional modules including resident management, maintenance billing, complaint tracking, and security gate management.
- Built role-based access control (RBAC) for 4 user personas: Admin, Resident, Staff, and Security Guard using Node.js/Express and React.
- Designed and integrated RESTful APIs connecting a MySQL database to both a React frontend and vanilla JS HTML client, ensuring data consistency across interfaces.
- Authored comprehensive project documentation (PRD, TRD, backend/frontend guidelines), standardized into a developer-facing Markdown guide.
- Debugged Node.js backend and React frontend environment setup issues collaboratively, improving team onboarding efficiency.

PROJECTS

CryoNex - Cold-Chain Logistics Platform

HTML5, CSS3, JavaScript (ES6), Tailwind CSS, Leaflet.js, Chart.js, Anime.js | Collaborators: Aaryan Raorane, Shreya Desai

- Built a pharmaceutical cold-chain logistics platform with real-time telemetry monitoring, tracking 6 global hubs (SIN, FRA, LHR, GVA, HND, BOM) via Leaflet.js interactive map visualization.
- Developed a multi-step Procurement Wizard with dynamic route calculation and cross-console state sync using localStorage and sessionStorage.
- Implemented automated excursion alerts (temperature, pressure, battery) and CSP security headers with input validation to mitigate XSS risks.

NexusChat - Real-Time Chat Application

Python (FastAPI), React (Vite), Tailwind CSS v4, MongoDB, WebSockets, JWT, Bcrypt | Collaborators: Aaryan Raorane, Shreya Desai

- Developed a full-stack real-time chat application using FastAPI (Python) backend and React (Vite) frontend, with WebSockets enabling near-instant message delivery.
- Implemented JWT-based authentication with Bcrypt password hashing, rate limiting, and input validation for security against brute-force attacks.
- Integrated async MongoDB (Motor driver) for scalable data storage, served via Uvicorn ASGI server.

FlowState - Focus OS | Cyber Cypher, NMIMS National Hackathon 2025

React 18, Vite 6, TypeScript, Tailwind CSS 4, Framer Motion, Lenis | Collaborators: Aaryan Raorane, Shreya Desai

- Designed and shipped a premium productivity OS concept in under 18 hours at Cyber Cypher (NMIMS National Hackathon 2025), qualifying Round 1 under competitive pressure.
- Built a modular React 18 + TypeScript architecture with custom "Premium Soft" design system, glassmorphism UI, Framer Motion physics animations, and Omni-Search (Cmd+K) command palette.

TECHNICAL SKILLS

Note: All technologies listed below are actively being learned as part of coursework, self-study, and project work.

Programming Languages: Python, C, C++, JavaScript (ES6), TypeScript, HTML5, CSS3, Java (Currently Learning)

Frameworks & Libraries: React, FastAPI, Node.js, Express.js, Tailwind CSS, Framer Motion, Chart.js, Anime.js, Leaflet.js (Currently

Learning)

AI / ML Tools: TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy (Currently Learning)

Databases: MongoDB, MySQL (Currently Learning)

Tools & Environments: VS Code, Dev-C++, Git, GitHub, Vite, Uvicorn, Overleaf (LaTeX) (Currently Learning)

Security Concepts: JWT, Bcrypt, CSP Headers, Input Validation, Rate Limiting (Currently Learning)

Operating Systems: Windows, Linux (Basic)

CORE COMPETENCIES

Artificial Intelligence & Machine Learning | Full-Stack Web Development | Real-Time Systems | Critical Thinking & Problem-Solving | Team Collaboration | Adaptability & Quick Learning

CERTIFICATIONS

- Programming for Everybody (Getting Started with Python) - University of Michigan - Coursera | Mar 2026 | ID: C6FKEHL7IVD4
- Python Data Structures - University of Michigan - Coursera | Mar 2026 | ID: I2NLN7OUFDGT
- Introduction to Java and Object-Oriented Programming - University of Pennsylvania - Coursera | Mar 2026 | ID: 4OU011SXXPT8
- Build a Fast Typing Game using Java Swing - Coursera | Mar 2026 | ID: 1V819NICNVX4
- Management Skills for New Managers - United Latino Students Association | Dec 2025 | ID: MGEYMJNXV1PQ
- Teamwork Skills: Communicating Effectively in Groups - University of Colorado Boulder | Dec 2025 | ID: QU9WEBM95PNT
- Grow as a Manager - United Latino Students Association | Dec 2025 | ID: 6CI71SGZCDZM
- Computational Thinking for Problem Solving - University of Pennsylvania | Jan 2026 | ID: 9JE4BRNUG2ZF
